

**IN THE SPECIFICATION**

**Please amend the Title on page 1, line 1 as follows:**

**AN IMAGING APPARATUS FOR RECORDING AND REPLAYING DATA**

**Please amend the paragraph beginning at page 9, line 10, as follows:**

In other words, the dial switch has a recording mode and the replaying mode. In the recording mode, there are a normal dial mode and a continuing dial mode. The normal dial mode includes the normal still image mode, the normal moving image mode, and the normal voice mode. The continuing mode includes the continuing still image mode, the continuing moving image mode, and the continuing voice mode. The normal dial mode is a mode in which [[a]] an association of simultaneous replaying and an association of a sequence of the replaying are not carried out in a plurality of recorded data, in the recording mode of the still image, moving image and voice. The continuing dial mode is a mode in which the association of simultaneous replaying and the association of the replaying sequence are carried out in the plurality of recorded data, in the recording mode of the still image, moving image and voice.
